# 360 Solution for Organizational Security

CRISISGO AlertGateway

AlertGateway takes messages from third-party systems or devices to trigger notifications in the CrisisGo safety platform, which immediately alerts designated site safety personnel to the situation.

The safety team members can use the additional features and functions of the CrisisGo platform to respond to the incident and manage the situation.

Why Do You Need It?

- Alerting additional staff, students, and parents of an emergency.
- Two-way emergency communication groups to keep everyone connected.
- Escalating emergencies to first responders.
- Accessing emergency protocols and activating emergency resources.
- Accounting for staff and students.

SafeVisitor & CrisisGo Integration

- SV Emergency Alerts delivered to CrisisGo
- SV Denied Entry delivered to CrisisGo
- SV emergency communication managed in CrisisGo
- SV Emergency Alerts escalated to law enforcement
